The Dolphin Mobile app lets you access your Dolphin via the Internet. Whether you are running Dolphin Imaging, Dolphin Management or both, you can enjoy secure access to all your patient images; patient treatment card entries; referring doctor information; view financial balances; your daily, weekly or monthly schedule. Easily zoom in or re-orient the image for close-up examination. Dolphin Mobile supports Aquarium and the new multi-platform Super Questionnaire. It works with WiFi and cellular networks, and securely accesses data directly from your practice in real-time. In addition, all data is securely encrypted. Runs on any iPhone®, iPad®, iPod touch® and most Android™ devices.

*Dolphin Mobile displays patient images and ceph tracings for convenient reference. However, patient diagnosis and treatment decisions should be made using only the full Dolphin Imaging software on a desktop computer.*

© 2020 Patterson Dental Supply, Inc. All rights reserved.

Dolphin Mobile utilizes a special Passcode feature that allows quick access to your Dolphin database using your existing name and password. Browsing history is recorded so you may easily retrieve recently accessed records.
