AnywhereDolphin is a web service available at no charge to members of the Dolphin Service Club. It uses data encryption to allow you to securely share Dolphin records and other correspondences with patients and referrals over the Internet, helping to keep your practice HIPAA-compliant. It also gives you access to training webinars and our Support Knowledge Base.

*Cephalometric Measurements*
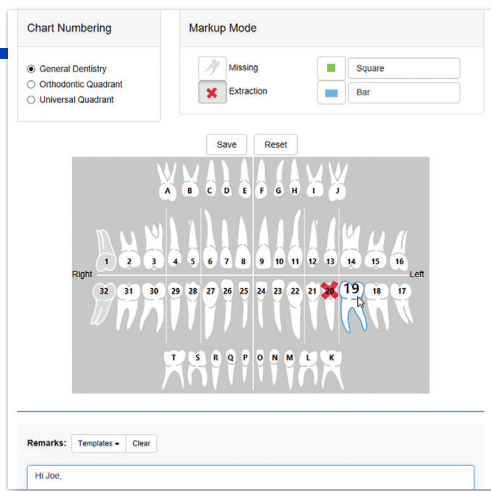

Record sharing

Share clinical records and other correspondence with patients and referrals, including X-rays, ceph tracings, 3D datasets, photos, treatment simulations, treatment request forms, and notes.

What you can do:
- Securely transmit image data and patient records directly from Dolphin Imaging.
- Choose which images each recipient can see.
- Recipients can view the records online without requiring Dolphin software.
- Give referrals permission to view cephalometric tracings and measurements online… no plugins required!
- Attach documents, images, or 3D models to messages sent via AnywhereDolphin. You can also select what attachment types (if any) that your referrals can send to you.
- Find out who accessed your records and when with event logging.
- Have your lab take pictures; x-rays; 3D volumes; perform the analyses; and then upload the records to you

Requirements:
- Dolphin Imaging and an active Dolphin Service Club subscription
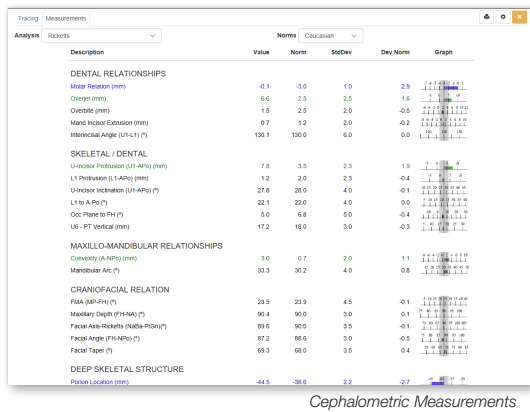

Patient/Billing Party access

Give patients and billing parties online access to tools and information such as:
- Super Questionnaire: includes medical history, informed consent, and your customized forms.
- Past and future appointments.
- Access to documents using the "Secure Email" feature in Dolphin software.
- Account balance summary, and online payment processing if your practice uses Vanco, OrthoBanc, or XCharge/OpenEdge.
- Account ledger.

Requirements:
- Dolphin Management and an active Dolphin Service Club subscription
