

What's new in Dolphin Mobile

8.0

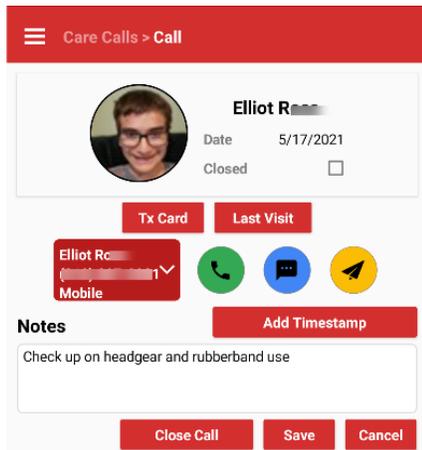

Welcome to Dolphin Mobile 8.0!

This document provides an overview of many of the new features that have been added since version 7.0

C O N T E N T S :

CARE CALL ENHANCEMENTS	2
NEW APPLICATION SETTINGS.....	2
PATIENT GPS.....	2
LOCATION SECURITY AND EMPLOYEE ROLES.....	3
SCHEDULE.....	3
SUPER QUESTIONNAIRE.....	3
GRID LINES.....	3
IMAGE LAYOUTS.....	3
MESSAGING CENTER.....	4

Care Call Enhancements

We improved the Care Calls->**Call** screen:

- The phone number no longer defaults to the first number in the list, but to the number associated with the scheduled care call.
- The phone number information is now a button that you can tap to see other phone numbers on file for the patient.
- We added the Messaging Center button; simply tap it to open the messaging center using the number shown.

New Application Settings

We have added the following new options to the Dolphin Mobile Settings menu:

Use the green slider to change the number of inactive minutes after which Dolphin Mobile will log you out.

Turn this option on to prevent users from copying and pasting contents inside writeable fields. Use this option when patients are entering information on the mobile device while in your office.

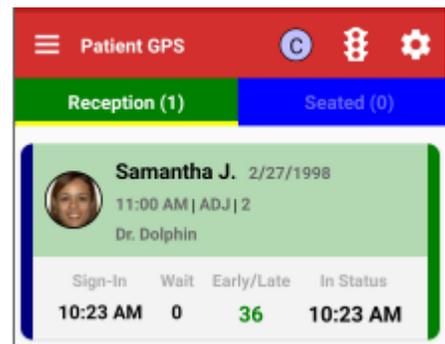

Turn this option on if you want Dolphin Mobile to automatically capitalize the first letter when you enter text, and after a period, question mark, etc.

Patient GPS

Providing you have Dolphin Management 10.6 installed, you can now access Patient GPS features from Dolphin Mobile:

- From the home screen, tap  to open the main menu, and tap  Patient GPS
- From the **Light Bar** screen, tap  to open **Patient GPS**.

From **Patient GPS**, swipe the status bar to view a list of patients in each status, see their sign-in time, how long they have been waiting, how many minutes they were early or late, and the time they entered the status.

The **Patient GPS** updates in real time, and it honors the color settings configured in Dolphin Management.

Location Security and Employee Roles

Dolphin Mobile now honors the location settings that are enabled in Dolphin Management as well as the application rights associated with the role assigned to each employee.

Schedule

You can now swipe up or down on the calendar to change the schedule year. Swipe up to move forward one year, and swipe down to move back one year.

Super Questionnaire

We added a settings button to the **Questionnaire** screen: 

Tap it to access two new options, which are toggled off by default:

- **Exit to Home Page** when toggled on, the app returns you to the home page after you finish signing a questionnaire.
 - **Skip to Unanswered** when toggled on, any partially completed questionnaires will load starting with the first unanswered question, so you can quickly get back to where you were previously.
-

Grid Lines

We have added an alignment aide for capturing patient photos using Dolphin Mobile.

For each photo you want to capture, you have the option to choose from no alignments 3x3 grid, 4X4 grid, or Golden Ratio Grid, as shown right.

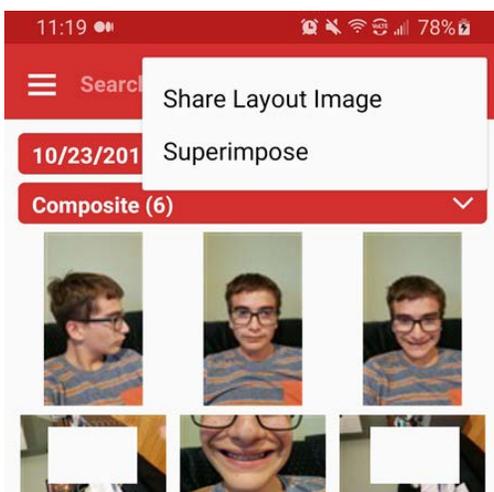

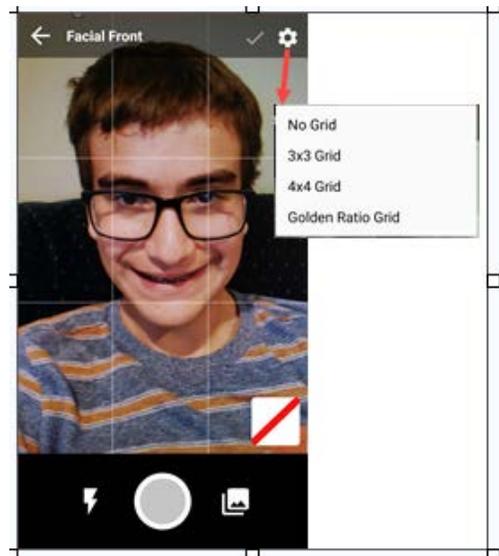

Image Layouts

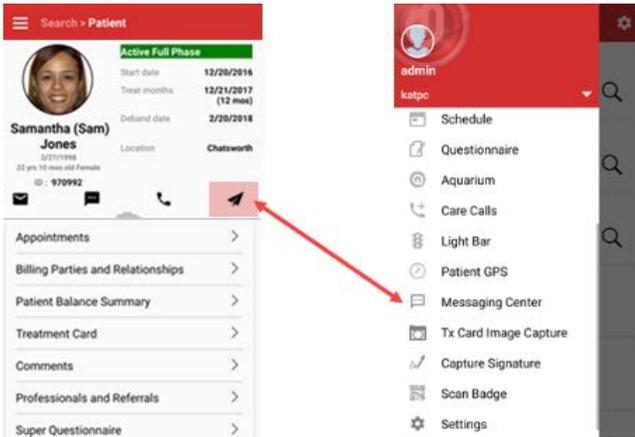

You can now create, save, and print image layouts from Dolphin Imaging in Dolphin Mobile.

From the **Patient>Patient Images** screen, select the layout you want to view, tap the more button and select **Share Layout Image**. This option is available for all image layouts except <All Images>.

The Composite (6) layout is shown at left.

A message is displayed while Dolphin Mobile creates a jpg file of the image layout in portrait format. From here, you can save the file, share it with a contact, or print it directly from Dolphin Mobile, if your mobile device is set up for printing.

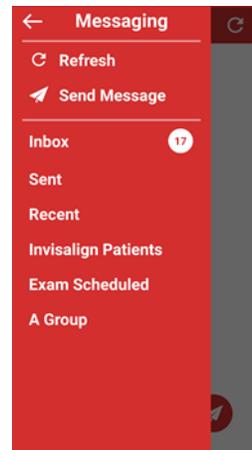

Messaging Center

Providing you have Dolphin Management 10.6 installed, and your practice is a subscriber of Premium 2-Way SMS Messaging, you can now access the Messaging Center from Dolphin Mobile. (For Secure Messaging, MyOrthodontist is also required).

From the Main menu, tap **Messaging Center** to open the **Inbox**, or from any patient, doctor, or billing party

screen tap the  to open the Message Center, or a screen where you can enter messages to the patient, doctor, or billing party (if you selected the

airplane icon).

From the Inbox, tap the  to open the Messaging screen, where you can access the Sent, Recent, and any groups you have configured on the SMS Messaging Center in Dolphin Management:
